**MEMBERS MEETING &  
Interactive Workshop**

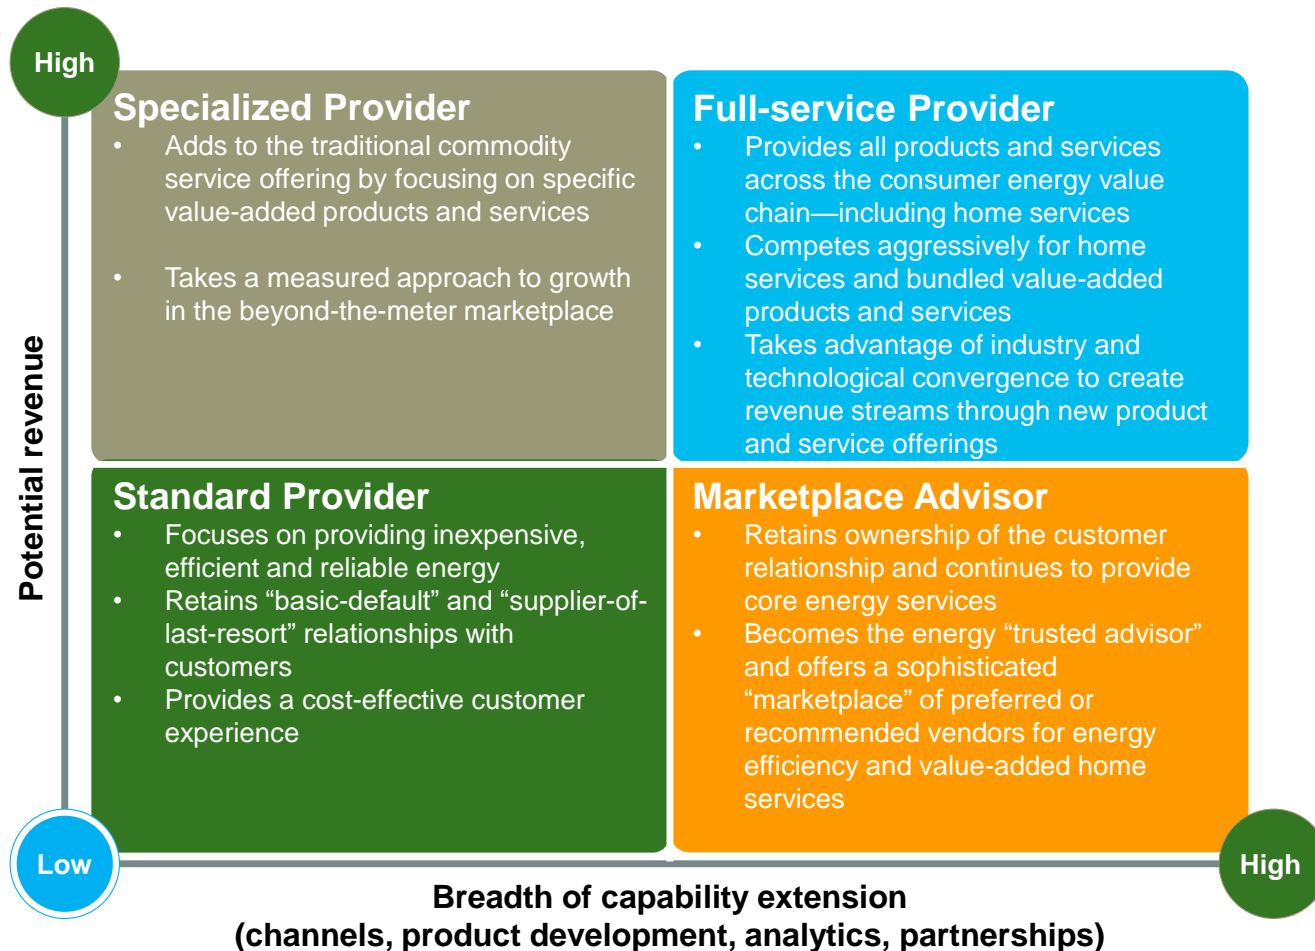

Chicago, Illinois | September 21-22, 2016

# New Brunswick Power's Big Opportunity

- Together we can be our customers partner of choice as self-sufficient energy options are available now.
- Let's grab this opportunity before someone else does!
- We are pioneers with incredible talent and infrastructure.
- Together we will transform NB Power and continue earning the trust of New Brunswickers.

# New Business Models are Emerging

Energy provider(s) may choose to offer you new products and services (e.g., solar generation, connected home, electric vehicle charging, home maintenance, back-up energy) in addition to electricity, gas and/or water. What role will your energy provider play?

# What is the most pressing question that we collectively face to get an engaged customer?
